Contents of Volume 27

Volume 27 No. 1 April 1997

PAOLO VIOTTI / Scaling Properties of Tracer Trajectories in a Saturated Porous Medium 1–16

I. N. NASSAR and ROBERT HORTON / Heat, Water, and Solute Transfer in Unsaturated Porous Media: I – Theory Development and Transport Coefficient Evaluation 17–38

I. N. NASSAR, HAMDY M. SHAFEY and ROBERT HORTON / Heat, Water, and Solute Transfer in Unsaturated Porous Media: II – Compacted Soil Beneath Plastic Cover 39–55

C. J. VAN DUIJN, R. E. GRUNDY and C. N. DAWSON / Large Time Profiles in Reactive Solute Transport 57–84

DANIEL M. TARTAKOVSKY and VITTORIO DI FEDERICO / An Analytical Solution for Contaminant Transport in Nonuniform Flow 85–97

JON D. McWHIRTER, MICHAEL E. CRAWFORD and DALE E. KLEIN / Wall Region Porosity Distributions for Packed Beds of Uniform Spheres with Modified and Unmodified Walls 99–118

Volume 27 No. 2 May 1997

THOMAS P. WITELSKI / Perturbation Analysis for Wetting Fronts in Richards' Equation 121–134

D.A. NIELD / Notes on Convection in a Porous Medium: (i) an Effective Rayleigh Number for an Anisotropic Layer, (ii) the Malkus Hypothesis and Wavenumber Selection 135–142

YU. DIMITRIENKO / Heat-Mass-Transport and Thermal Stresses in Porous Charring Materials 143–170

I. LAKATOS, K. BAUER, J. LAKATOS-SZABÓ, I. CSIGE, J. HAKL and H.-J. KRETZSCHMAR / Diffusion of Radon in Porous Media Saturated with Gels and Emulsions 171–184

M. DONG and F.A.L. DULLIEN / A New Model for Immiscible Displacement in Porous Media 185–204

JEAN-LOUIS AURIAULT and JOLANTA LEWANDOWSKA / Effective Diffusion Coefficient: From Homogenization to Experiment 205–223

ZHANGXIN CHEN and RICHARD E. EWING / From Single-Phase to Compositional Flow: Applicability of Mixed Finite Elements 225–242

Volume 27 No. 3 June 1997

Y. DE PARSEVAL, K.M. PILLAI and S.G. ADVANI / A Simple Model for the Variation of Permeability due to Partial Saturation in Dual Scale Porous Media 243–265

DONGXIAO ZHANG / Conditional Stochastic Analysis for Multiphase Transport in Randomly Heterogeneous, Variably Saturated Media 267–289

L. STORESLETTEN and D.A.S. REES / An Analytical Study of Free Convective Boundary-Layer Flow in Porous Media: The Effect of Anisotropic Diffusivity 291–306

S. VOLIK, V.V. MOURZENKO, J.-F. THOVERT and P.M. ADLER / Thermal Conductivity of a Single Fracture 307–327

M. HENNENBERG, M. ZIAD SAGHIR, A. REDNIKOV and J.C. LEGROS / Porous Media and the Bénard–Marangoni Problem 329–357

R. DE BOER / Once More: Uplift, Friction and Capillarity in Liquid and Gas-Saturated Porous Solids 359–368
